

# 2Sieve

## Ultrasonic Sieving System

Whether it is titanium, cobalt-chrome, aluminum or any alloy, the sieving system 2Sieve helps you to optimize the powder quality to achieve optimal printing results.

### Technical Data

Mesh:	63 $\mu$ m
Sieving Capacity:	approx. 1 kg per 30 min
Output Frequency:	33-37 kHz
Electrical Connection:	115 / 230 VAC; ~50/60 Hz
Weight:	70 kg
Dimensions (W $\times$ D $\times$ H):	355 $\times$ 450 $\times$ 1250 mm

### Main Advantages

- + Compact Design
- + Integrated HEPA filter for maximum Safety
- + Safe Screening under Protective Gas
- + Fit directly into the 2Create & 2Create Plus
- + Safe, Simple, Efficient
